eWork Activities registration with Clocking

eWork is the on the go work registration app which integrates a geolocated virtual clocking system with the registration on time of all the jobs made in different workplaces and at different Clients' and with the mobile personnel absence request management.

It's perfect for the personnel working outside the company, as the home care assistants, consultants, workers making visits and inspections to the clients, who work in the logistic field, or in construction sites and in co-operatives.

It has been developed for the demanding companies that pay attention to the quality, to the service level and to security.

-  It is compatible with your current company presence system or it is included with the EcosAgile System.
-  Precise with GPS, NFC, Beacons and QRcode Multilingual, with different active translations.

COMPLIANT DATA PROTECTION AUTHORITY

eWork fully respects the Data Protection Authority directives: it doesn't work in background and **doesn't track the employee**. It uses GPS in order to program activities and the different locations.

POWERFUL WITH TIME SYNC

eWork runs also with **non signal**, indoors and without network, in Italy or abroad. The work registration with the clocking will be transmitted to the server automatically during the next synchronisation.

SECURE WITH SIX ANTI-FRAUD ALGORITHMS

eWork is born aiming **security** in his project, doing internally anti fraud controls, this can guarantee the quality and the reliability of the collected data to the company. The current version includes six different anti clocking manipulation proprietary control algorithms.
