

Real-time QR code clocking. Attendance tracking, digital Wi-Fi and SIM access management.

Digital punch clock that keeps pace with the latest technology, designed to record time and attendance and control personnel access in the company.

Innovative attendance tracking that is simple, intuitive and completely cloud-based, providing instant management of the entire time and attendance process: **Time and Attendance, Access Control, Travel, Vacation and Leave**, with associated workflow requests and approvals.

It is activated **with no infrastructure or installation costs**, just a Wi-Fi connection, **4G LTE SIM**: no terminal, installation and maintenance costs.

Ideal for shops, institutions, offices, warehouses, corporate headquarters, manufacturing plants and healthcare facilities.

▶ Real-time integration with the EcosAgile **time management system**, including daily time card processing and periodic software updates.

▶ Multi-language QR code technology with multiple active translations

QR CODE CLOCKING

The QR code is generated by the **APP** and **brought close** to the front screen of the device, enabling attendance tracking with the name and clock-in/out direction displayed on the top touchscreen.

ACCESS MANAGEMENT

The device can be equipped with a single channel relay connected to automatic doors, turnstiles, gates, allowing the **management and control of personnel access**, with the door opening upon **recognition of the QR code** that the personnel present on their smartphone in front of the reader.

NFC CLOCKING

Equipped with an **NFC reader on the front**, the device turns into a digital timeclock with **NFC RFID cards**.
