compliance

Who is it designed for

- ✓ Companies that want to manage statutory obligations and monitor and coordinate stakeholders conveniently and with certainty
- ✓ Firms and associations who wish to offer their clients value-added services with high quality industry
- ✓ Distributors and System Integrators looking for solutions with value; differentiated and adapted to the specific needs of their clients

What is EcosAgile Health&Safety?

Employers and managers are obliged to ensure compliance with laws and safety regulations; they must conduct risk assessments, monitor deadlines and make sure that people are informed and trained for the job that they're going to do, as well take the necessary medical examinations.

EcosAgile Health & Safety is the software that provides all relevant managers with a complete, real-time picture of the company situation, allowing for improved coordination between the different stakeholders and management of compliance activities, while **reducing complexity and management costs, highlighting deadlines and critical factors and enabling timely, quality, well-defined and simplified management.**

It is seamlessly integrated with all the other products in the EcosAgile suite so that it can easily interact with other required processes.

Why EcosAgile Health&Safety?

The application provides a full set of functions regarding health and safety in the workplace; **it is extensive yet straightforward, easy to adopt and customize as needed.**

The features are designed in a practical and effective format in order to provide the best possible support to the various decision-makers involved: the Employer, the Head of Safety and the Competent Doctors.

Our solution has the distinct advantage of not being overly complex and expensive; it has been carefully and deliberately designed to be linear and simple and at the same time have the ability to be integrated and extended to suit company-specific situations.

INNOVATIVE solutions

A unique and innovative platform

F O R E N T E R P R I S E

The EcosAgile platform is based on an innovative technology that manages objects and relationships through a configuration approach, without complex and expensive project, programming and testing phases.

The product can be customized with simplicity and functionality is constantly improved. A unique feature is the fact that **customizations and release upgrades coexist without additional costs and risks**, adding value to the investment over time.

The same end user can manage changes over time in a simple and autonomous fashion, without any programming.

The **solution** is fully **web based** and is delivered in **Cloud/SaaS mode** or in **on-Premise/License Agreement mode**.

MAXIMUM ACCESSIBILITY, WEB 2.0

Easy extension of the information/procedures to management and staff through the Self-Service functions and workflows already bundled in the standard product.

NATIVE HANDLING DEPH HISTORICAL DATA

The correlation between the current and historical information is handled natively by the package, with significant benefits in terms of lower cost, higher quality and better integrity of the information managed.

POWERFUL AND STATE OF THE ART

Multi-company, multi-country, multi-language (including Unicode management) and multi-currency. Careful security/privacy management. Powerful workflow engine.

MAXIMUM WEALTH OF INFORMATION

Any report, list or grid can be exported to excel. Default charts, flexible analyses and analytics rapidly provide all the information needed to work with your business data.

Advantages

Extraordinarily flexible and easy to use

Complete and integrated, even with existing company software and always updated to the latest version

Quality for Total Cost of Ownership that competitors cannot match
