

EcosAgile Project&Timesheet

" trouble ticketing, tracking tasks,
costs and margins control "

Beyond traditional Project management

ENTERPRISE
SOLUTIONS

What is EcosAgile Project&Timesheet?

EcosAgile Project & Timesheet is a direct and immediate solution for the **management of projects and client services**, providing all the tools necessary to render the correlated activities simple and efficient, and provide timely information necessary for the analysis and control of the project/job.

This tool is suitable for the management of different types of projects and the processes for managing the personnel involved (absences, travel, per diem, etc.).

It is seamlessly integrated with all the other products in the EcosAgile suite so that it can interact with any other required processes.

Why EcosAgile Project&Timesheet?

The application allows the management of projects throughout their life cycle: the **opportunities, reporting, profitability analysis, billing**, etc. It provides the ability to **manage different types of projects**, whether they are lump sum, turnkey, hourly, time & material, on call, pre-paid, progressive payments, milestones, regular repayments, services and/or products, etc.

There are various functions for assigning tasks to employees, managing internal communications, document handling for project knowledge management, deliverables and administrative documentation of clients.

You can use **different Timesheet formats** depending on the type of management regime, the type of relationship, etc. The managers administer the approvals and coordinate assigned personnel according to various configurable modes based on logic structures including hierarchy, project, cost centre, clients, client clusters, etc. Predefined interfaces and a **specific configurable integration component** allow you to import and export record layouts in any format, thus avoiding the frequent problems of integration seen in competing solutions.

Who is it designed for

EcosAgile Project & Timesheet is essential for **service companies** that work on projects, including **consultants, associations and professional firms** who want to monitor and manage costs related to projects; but especially for those that wish to develop their know-how and boost business performance.

EcosAgile

INNOVATIVE solutions

FOR ENTERPRISE

A unique and innovative platform

The EcosAgile platform is based on an innovative technology that manages objects and relationships through a configuration approach, without complex and expensive project, programming and testing phases.

The product can be customized with simplicity and functionality is constantly improved. A unique feature is the fact that **customizations and release upgrades coexist without additional costs and risks**, adding value to the investment over time.

The same end user can manage changes over time in a simple and autonomous fashion, without any programming.

The **solution** is fully **web based** and is delivered in **Cloud/SaaS mode** or in **on-Premise/License Agreement mode**.

Advantages

- ✓ Extraordinarily flexible and easy to use
- ✓ Complete and integrated, even with existing company software and always updated to the latest version
- ✓ Quality for Total Cost of Ownership that competitors cannot match

MAXIMUM ACCESSIBILITY, WEB 2.0

Easy extension of the information/procedures to management and staff through the Self-Service functions and workflows already bundled in the standard product.

NATIVE HANDLING DEPTH HISTORICAL DATA

The correlation between the current and historical information is handled natively by the package, with significant benefits in terms of lower cost, higher quality and better integrity of the information managed.

POWERFUL AND STATE OF THE ART

Multi-company, multi-country, multi-language (including Unicode management) and multi-currency. Careful security/privacy management. Powerful workflow engine.

MAXIMUM WEALTH OF INFORMATION

Any report, list or grid can be exported to excel. Default charts, flexible analyses and analytics rapidly provide all the information needed to work with your business data.
