

## Thermoscanner and Time Attendance

Device for temperature measurement and possibility of Personnel clocking in using NFC technology.

Designed to manage access control with door opening, turnstiles and company gates, it is a solution in compliance with current regulations and without any data storage.

Integrated with the EcosAgile Time Cloud system or with the system already in use in the company, it transfers time attendance data in real time.

- ▶ Body temperature measurement of an employee at 0.7 m distance with accuracy of  $\pm 0,3^\circ$
- ▶ Artificial intelligence, infrared sensors and binocular camera for rapid recognition of mask and PPE presence
- ▶ It is activated immediately by simply connecting to network via **Wi-Fi, Ethernet, or 4G-LTE** with SIM Card

### TERMOSCANNER CONTACTLESS

Thermal camera for secure contactless body temperature measurement without any assistance required by the personnel in charge.

### BIOMETRIC CONTROL

Quick recognition of the presence of the mask and PPE without identification or data transmission and with the assistance of a guide voice.

### SAFETY

Data management is completely in Italy in full compliance with national and European regulations and with the application of the highest safety standards in the sector.

### TIME MANAGEMENT

NFC time clocking with badge approach combined with app and web time stamping from the EcosAgile Time Cloud system for a fully integrated Time & Attendance system.
