

OrgChart Agile : Organize. Visualize. Define strategies.

OrgChart Agile is the flexible web-based Org Charting Solution that can quickly build org charts and analyze the organization based on chosen metrics, including comprehensive workforce planning and analysis from all perspectives, in order to make more informed decisions and better respond to organizational changes.

Flexible cloud-based Org Chart Software to quickly create, access, and share organization charts.

Organizational change management

OrgChart Agile allows you to build a solid organizational structure that aligns the company better and simplifies the workflow.

OrgChart Agile offers your company:

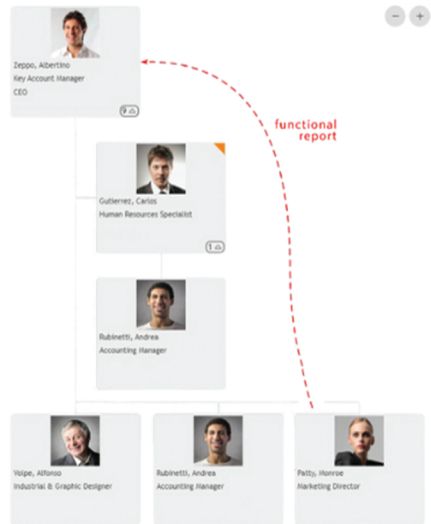

- Charts worthy of presentation to the Board of Directors with sophisticated workforce analysis tools to reveal the metrics and KPIs.
- Drag&Drop functionality to plan organizational changes and optimize the workforce.
- Publications, including HTML or navigable documents in PDF format.
- A wide range of presentation features for change tracking and quick decision making thanks to predefined and freely buildable reports.

Save time by analyzing your company

Companies often use a number of applications that require manual creation of organization charts to analyze workforce data. OrgChart Agile has advanced intuitive and powerful tools, such as conditional formatting or data refresh (maintaining formats or applying templates), as well as scheduling or statistical measurements for in-depth workforce analysis. In addition, it enables the creation and analysis of organizational charts in a shorter time, saving valuable staff hours and offering additional functions to align the workforce with corporate objectives.

OrgChart Agile

OrgChart Agile offers functionalities of automated import and publication via scheduled files or APIs. Simply map data into fields or use the quick data import function. Automatically synchronize data to update your chart and schedule organization charts for sharing, according to authorization rights, and for publication automatically as PDFs, on the intranet or on the Web.

Creating diagrams

- Easily create professional organization charts worthy of presentation to the Board of Directors
- Apply views and drawings based on the most advanced principles in the industry
- Display statistical measurements of Human Resources (e.g. salaries or span of control)
- Data import from Microsoft Excel, TXT/CSV and real-time APIs
- Import Scheduling

Planning and Analysis

- Model scenarios to explore organizational changes
- Easily analyze your data using predefined reporting tools
- Export diagrams data to Microsoft Excel
- Add or remove employees without rearranging the diagram, maintaining the graphical formatting and the box layout
- Quick actions on the diagram to make changes

Formatting

- Automatically formatted diagrams for immediate printing or optimized display
- Collection of symbols to replace text with easy-to-understand icons
- Professional pre-built templates and examples of diagrams
- Smart Fields highlight data that match the conditions defined by the user
- Conditional Formatting highlights data that match the user's criteria

Data Automation

- Advanced import functionalities for filtering and sorting of data
- Hierarchy mapper to manage unassigned positions or groups
- The Change Log catalogues all changes made to the diagrams
- Synchronization of planned data with data source to keep diagrams up-to-date

Printing and Publishing

- Create directories, phone and email addresses lists
- Print Wallpapers or Brochures
- Print preview to review the diagram before printing
- Guided publication to configure publishing and printing options
- Publish diagrams in PDF and web format online

Reporting and Drag&Drop

- Follow organizational changes with a detailed audit trail
- Automatically updated predefined reports, for quick decisions
- Change Summary Reports list all the details of the made changes
- Data Analysis dashboard using vector graphics, customizable and with drag & drop
