## How to manage an increasingly hybrid workspace

*Tools and solutions to help companies return to the office through a reimagining the workplace*

# A fundamentally changed world of work

The health emergency of the past few years has radically changed the job market, forcing companies and employees to live with a new work model and come to terms with the daily grind of **smart working**.

But if working remotely was the quickest and obligatory response for more than  $\frac{1}{4}$  of people in the first months of the pandemic, today new approaches are being sought that are capable of **putting the office back at the center** of an idea of sociability that satisfies the worker and his need, on the one hand, to spend more time at home with his **family** and, on the other, to have a more direct relationship with his **colleagues** that is not limited to a simple video call on a PC.

According to a WeWork survey of 1,000 executives and 1,000 employees conducted in partnership with Workplace Intelligence, most people expect to continue working from home at least a few days a week, and 75 percent would give up a company benefit if it meant more **flexibility** and **freedom** to choose where they work.

**Hybrid** has now become the word associated with the new flexible work in the **post Covid** world, as the balance point between in-person and remote work.

A new model in which employees have to opportunity to work in a variety of spaces, including corporate

**offices, coworking**

areas, public spaces, and home.

Work in multiple environments in a single week, including the ability to split the day between

**different locations.**

It will therefore be necessary for employers and administrators to integrate the different spaces and organize the weeks: imagine a new

**management**

of the environments, taking into account the **security of**

**the sites**, the ease of access and occupancy of the

**offices**, avoiding overlaps and overcrowding through quick and

**easy software**

solutions and tools.

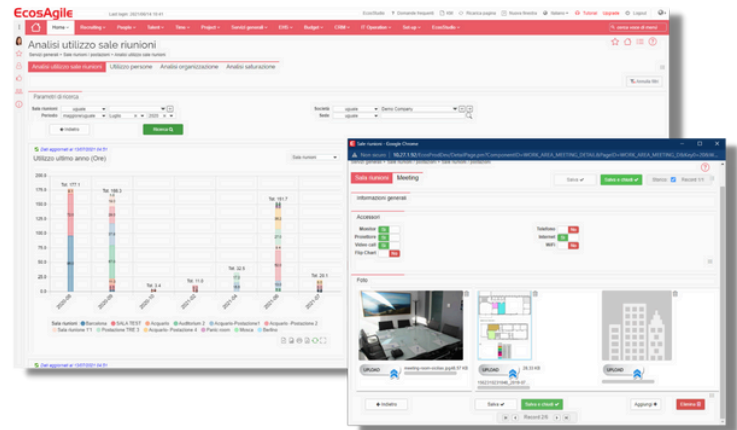

# EcosAgile software for Workspace and Room Reservation

EcosAgile Workspace is the software for reservation and web management of workspaces, coworking areas and meeting rooms to optimize environments for intelligent workplaces.

It supports the gradual return to the office and is described as an excellent tool for managing workspace sharing, helping the facility manager to manage and schedule on-site spaces, combining flexibility and agility of work with the safety of employees.

With usage policies, reporting, calendars, and a comprehensive view of room characteristics, it allows workspaces to be divided into fixed, stably assigned, and multi-person, bookable and occupied.

## Cloud

EcosAgile Workspace is delivered in the cloud and is characterized as a flexible, simple and cost-effective solution accessible via the Internet. System updates are continuously released to ensure that users always have the latest version of the product.

## Responsive

The platform is accessible from any device. The responsive design allows navigation from a desktop, tablet or smartphone.

## User experience

Immediate, clear and easy-to-use graphical interface to help the user navigate and structure a personalized, engaging and fulfilling experience.

# eMeeting Device for booking meeting rooms

EcosAgile eMeeting is the Wi-Fi display for enterprise meeting management and scheduling. It allows the organizer to make meeting reservations in seconds with just a few clicks, with attendee registration and real-time view of room status, availability and features.

It requires no additional installation or infrastructure and can be placed on any surface near the room.

It allows you to set usage policies to ensure control over the number of attendees and time of stay, cancel room reservations, and extend or shorten their duration.

## Features

- 10-inch touch screen
- Ethernet connectivity, Wi-Fi, POE
- Real-time data transfer with EcosAgile Workspace for web-enabled management via browser and device
- Integrated with Google, Outlook to send meeting reminders to attendees
- NFC technology for recognition via badge or unique access code

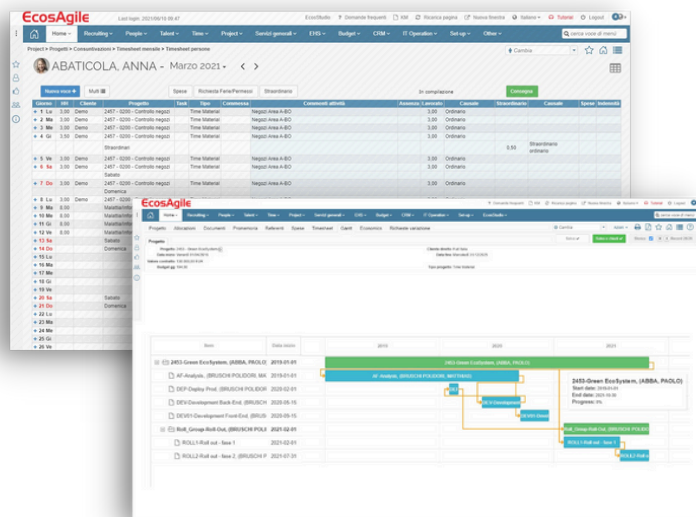

# EcosAgile software for agile work management

Smart Working is an increasingly widespread and necessary model in many business realities: for this reason, it is now essential to be equipped with simple tools that give flexibility and speed to processes.

EcosAgile Smart Working is the agile and integrated software that, thanks to the cloud, allows managers, employees and collaborators to work effectively wherever they are, thanks to web and application solutions focused on process optimization.

- Remote workers clock in via smartphone with eTime APP, available on iOS and Android

- Schedule work activities with task definition for project and work orders
- Manage time balances on timesheets
- Track progress with GANTTs of assigned tasks
- Share information and documents with automatic security rules to ensure access

# Workplace Safety with eBiometric

EcosAgile eBiometric is the time and attendance device with contactless thermoscanner for body temperature measurement.

It guarantees time clocking with **NFC technology** by simply bringing the badge close to the device, with data transmitted in **real time** to EcosAgile Time software or other systems already in use in the company.

Equipped with a **thermal camera**, it allows the detection of the **body temperature** of personnel with an accuracy of  $\pm 0.3^{\circ}\text{C}$  and at a distance of 0.7 meters.

## Features

- 8-inch touch screen
- Dimensions (mm): 323 (L) 135 (W) 30 (H)
- Badge Clocking with NFC Technology
- Ethernet, Wi-Fi, Bluetooth and 4G connectivity with SIM card
- Camera with infrared sensors to measure body temperature
- Dual-lens binocular camera for personal identification
- Complies with European A.I. regulations
