# Project Management: an increasingly important market

The increasing size and complexity of the modern work environment, with the pandemic and rise of hybrid work, requires a more advanced project management strategy: therefore, we see a growing global demand for project management tools, resulting in an increase in its global market value, which is estimated to reach **\$9.81** billion by 2026.

## 35%

[Wellington - 2020]

of **Project Manager** are **satisfied** with the current state of project management tool on the market

## 12%

[P.M. Institute - 2020]

of **resources** **wasted** due to poor project management due to inferior and poor processes

## 24%

[Monday - 2019]

of respondents consider **repetitive administration** and data entry to be the biggest **waste of time** at work.

## 43%

[Wellington - 2020]

of organizations complete projects **within budget**

## 29%

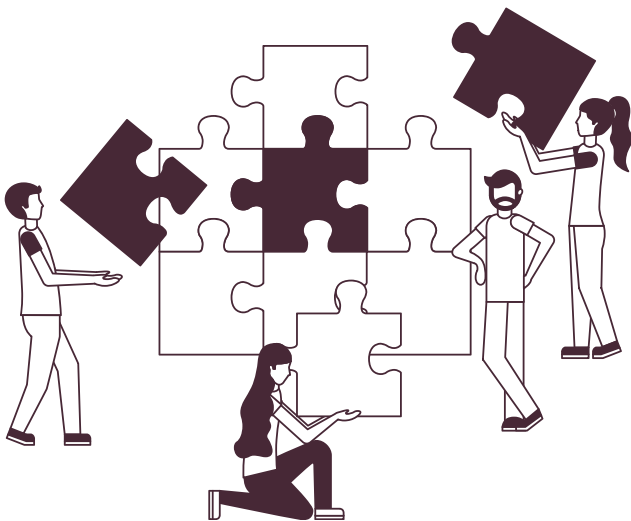

[Wellington - 2020]

of organizations complete the project on time and within the **specified deadline**

# The importance of HR in Project Management

Over the years, project management has been enriched with a set of activities, **management methodologies** and **information systems** that have provided rigor and technique to establish fixed points to follow in order to achieve objectives.

However, it is not enough to know how to make the best use of tools and technological solutions. The success of a project also depends on the qualities, characteristics and skills of the **people involved**: the level of detail is often so high that each collaborator becomes crucial, capable of influencing subsequent activities and determining the punctuality or delay of planned schedules.

“  
*It is therefore fundamental to select the right people for a project according to its duration, nature and criticality, which determine different professional profiles*  
”

# EcosAgile software for Project Management

EcosAgile Project & Timesheet is the cloud-based project planning and management software that supports the organization in all phases of planning, initiating, developing and managing a project through a set of useful HR tools and instruments to always have an attentive and informed view of the team involved.

It enables real-time control through intuitive and functional tools for the project manager with GANTT, WBS, Kanban and many other features.

EcosAgile Project & Timesheet is a unique solution that can integrate project management with time management for attendance and absence and talent management for skills and evaluations.

## Cloud

EcosAgile Project & Timesheet is delivered in the cloud and is characterized as a flexible, simple and cost-effective solution accessible via the Internet. System updates are continuously released to ensure that users always have the latest version of the product.

## Responsive

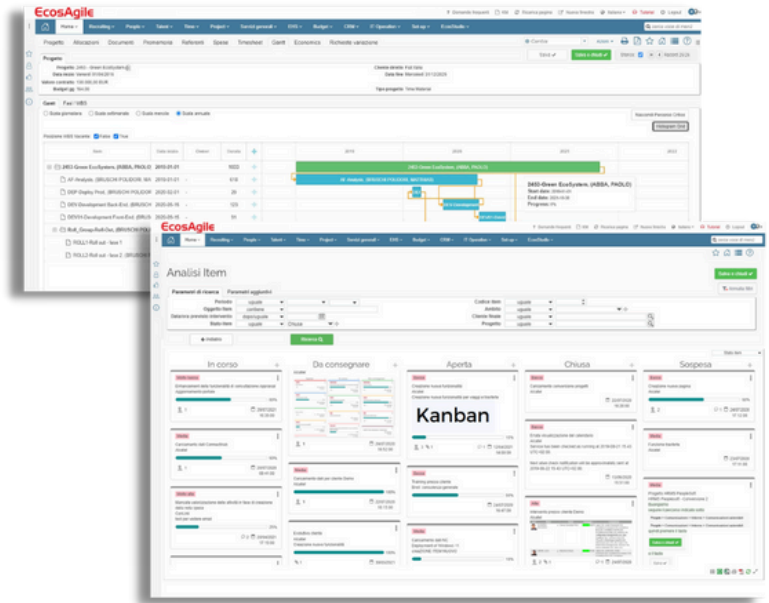

The platform is accessible from any device. The responsive design allows navigation from a desktop, tablet or smartphone.

## User experience

Immediate, clear and easy-to-use graphical interface to help the user navigate and structure a personalized, engaging and fulfilling experience.

# Project Management

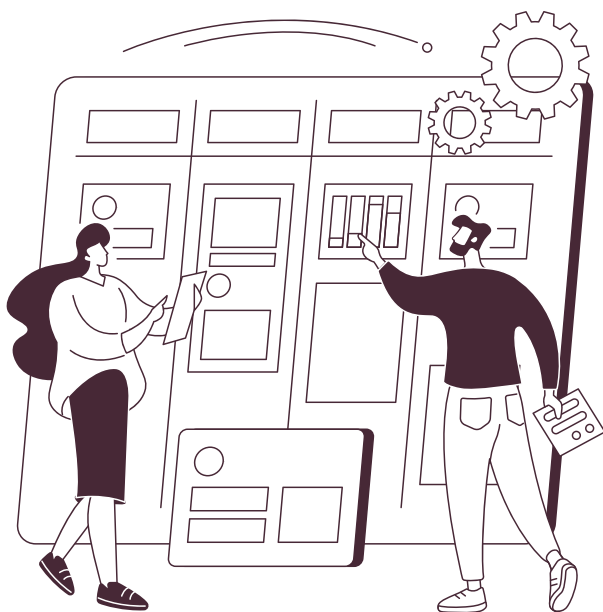

**GANTT, WBS, Kanban**, and many other planning tools for **real-time** tracking of all project phases and progress, schedules, stakeholders: scheduling, *task* assignment and mapping, *analysis by job*, *cost and revenue calculation*, sharing and uploading of documents and deliverables.

## Kanban Project & Timesheet

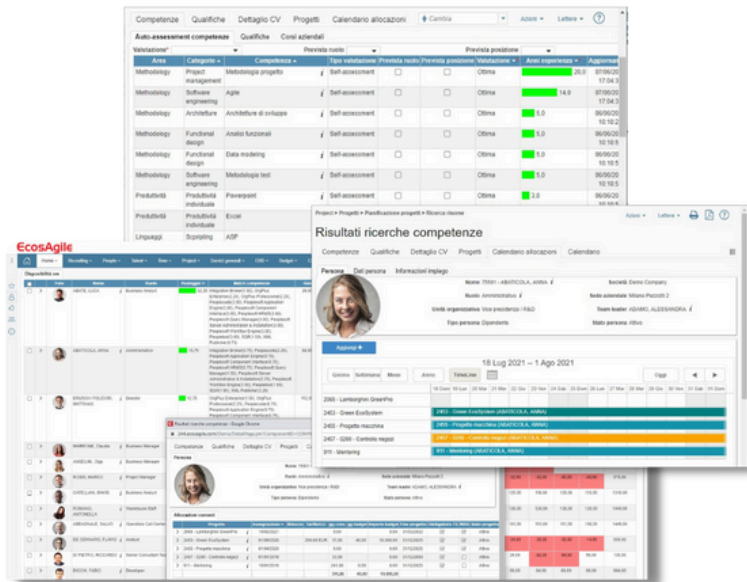

They allow graphical representation and **visualization of workflows** to delineate areas of projects that need improvement and **to prioritize goals** within the team. The user can;

- *decide what to display on the tabs*
- *view tabs based on parameters of their choice*
- *use visualization filters*

# Human Resources

Project & Timesheet allows you to always have an attentive and informed view of the team and resources involved, **matching** the most appropriate **skills** to tasks, **checking certifications** and curricula, selecting and **assigning people** by role, constantly sharing feedback and detailed mapping of goals, tasks assigned.

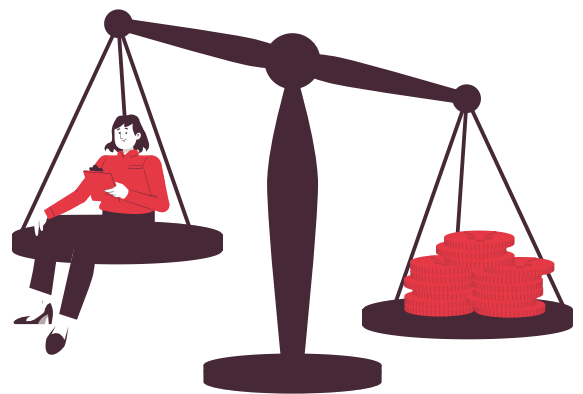

## Staffing and capacity planning

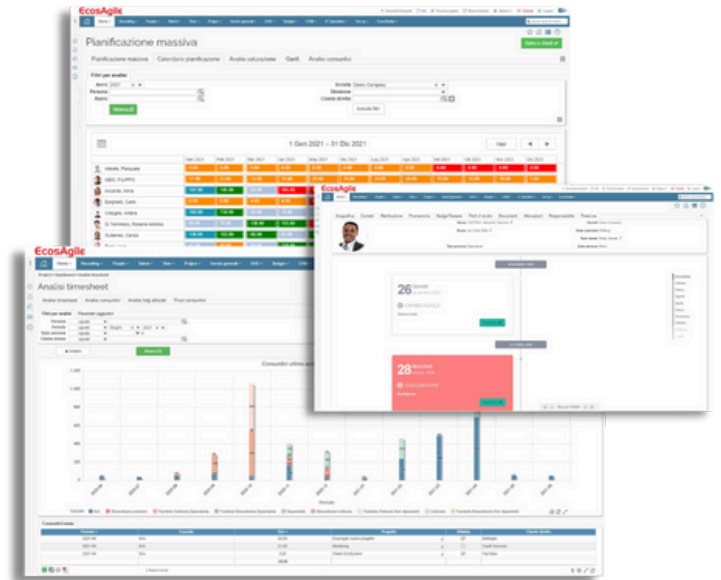

Assists managers in identifying, selecting, and assigning resources to a project based on their **skills, responsibilities, roles**, and workload.

It enables real-time visualization of capacity by resource and month, with the goal of **optimal allocation** in relation to workload and activity for the period.

# Timesheet

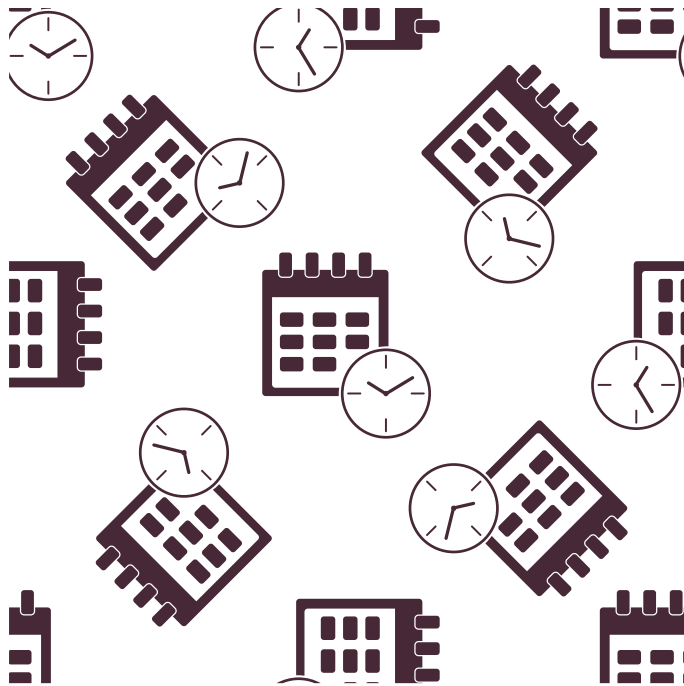

The timesheet is a **digital record** of the activities performed by each team member during each hour of their activity. It provides a complete and detailed view of project phases and helps to inform and share activities, updates and details about the client, managers or jobs.

P&T provides **3 different timesheet templates** (monthly, weekly, daily) in an information sharing perspective.

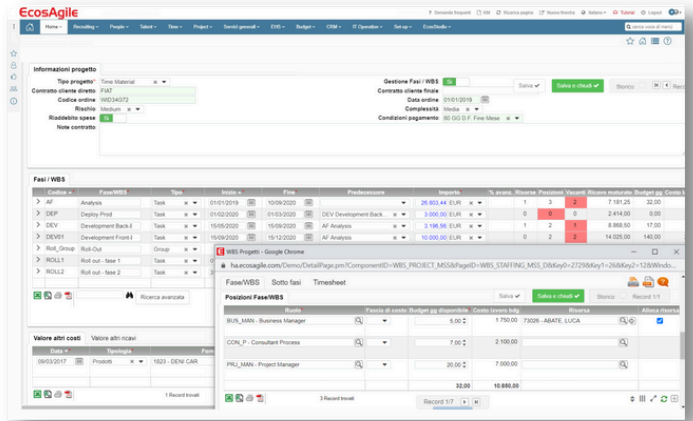

- Optimization of the resources involved
- Management of holidays and various vouchers
- Expense reports and project economics

Supports the monitoring of resources in activities, in approval workflows for **leave requests** and **expense reports** with standardized digital storage, and with timesheet completeness checks based on the time profile.

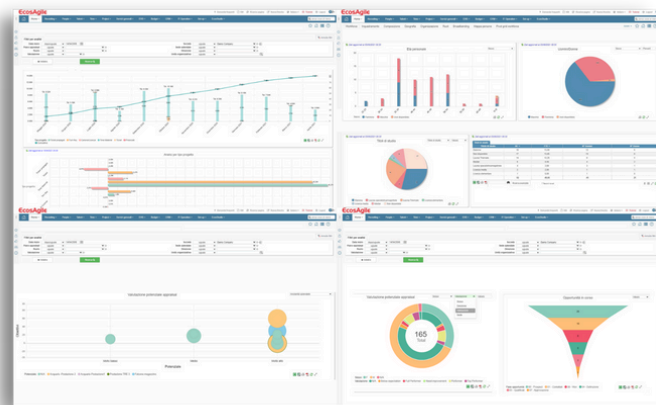

# Planning and Budgeting

With P&T, monthly planning can be done by **project**, **order**, **activity**, **task**, and **WBS phase**, with the ability to define the project budget by sales amount on an order or by monthly number of hours on an order. The PM can request **budget changes** as the project progresses.

# Report and Payroll

Constantly updated summary framework for project control with cost, revenue, and margin calculations and on-page **charts and pivots** for project managers and corporate controllers, plus the ability to integrate directly with more than 15 **payroll systems** with management of absence calendars and vacation schedules through to administrative payroll closing without further activity or data entry.

# ABOUT US
