

# EcosAgile

## Intelligent enterprise Time and Attendance solutions

*Software, applications and devices for access control and monitoring of work and vacation schedules*

# Attendance Tracking in Companies

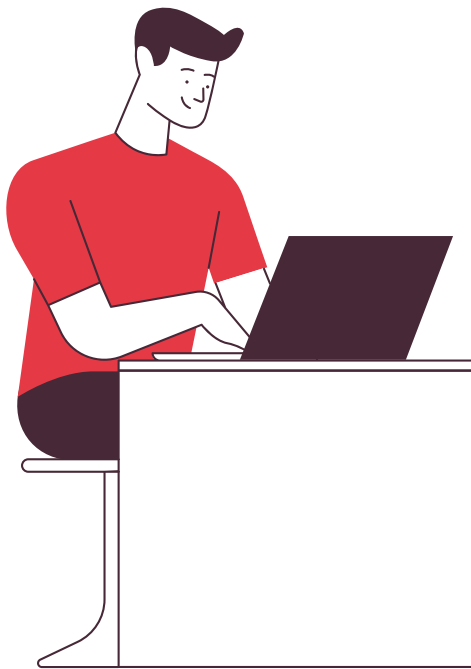

Tracking the attendance and working hours of employees is one of the most important basic activities for HR managers in a company.

Knowing which employee is working where, knowing his or her vacation schedule and requests, and having a complete view of the recorded time clocks and shifts of a team are now proving to be necessary in a working world characterized by an increasing push for hybridity and flexibility.

Despite this new trend and the declared willingness of almost 90 percent of Italian SMEs to open up to digitalization in order to boost their business (as evidenced by the 2019 Digital Innovation Observatory research), there are still many, too many, realities in the country that use outdated and risky tools to manage attendance and working hours.

Excel sheets, documents in Drive, or even tables made by hand, which inevitably increase the possibility of making mistakes and throwing away useful data for tracking purposes.

## **Software solutions designed**

specifically for human resource management can help companies be **faster and efficient** in their administrative practices.

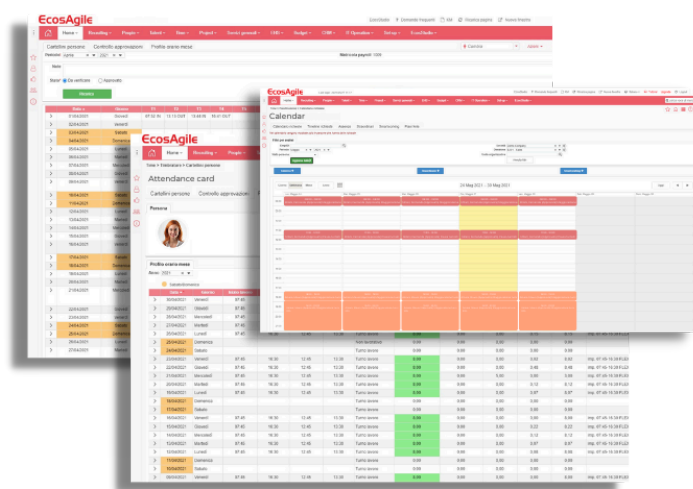

With a few clicks and simple steps, **employees** can clock in and out, schedule time off, and make requests, while **managers** have a complete view of the approval cycle, calendars, and attendance times so they have the data they need to process **vouchers** and communicate directly with payroll systems.

# EcosAgile software for Time and Attendance

EcosAgile Time is the cloud-based Time and Attendance software that offers easy and comprehensive management of all phases, from absence requests to approvals, from vacation plan management to time off.

EcosAgile Time automatically manages vacation, ROL, and time off, allowing for accurate vacation planning and a timely view of each employee's remaining hours.

Every employee and manager can log in to the platform at any time to check their leave status, vacation plans and team calendars, which are synchronized with Google and Outlook calendars.

## Cloud

EcosAgile Time is delivered in the cloud and is characterized as a flexible, simple and cost-effective solution accessible via the Internet. System updates are continuously released to ensure that users always have the latest version of the product.

## Responsive

The platform is accessible from any device. The responsive design allows navigation from a desktop, tablet or smartphone.

## User experience

Immediate, clear and easy-to-use graphical interface to help the user navigate and structure a personalized, engaging and fulfilling experience.

# EcosAgile's Virtual Time clocking Application

EcosAgile eTime is the ideal virtual time clocking application for onsite, remote and smart working employees. Employees can clock in and out in seconds with just a few clicks directly from their smartphone, where they can also request vacation, leave and overtime.

All this is synchronized in real time with the company's existing time and attendance and payroll systems and with EcosAgile Time.

## Features

- Integrated time and attendance with geolocation: accurately identifies the exact address of the time stamp using GPS, NFC, beacons and QR codes.
- Works even if there is no signal: the time stamp is automatically transmitted to the server at the next synchronization.
- Guarantees the security of the data provided, preventing the tampering of timetables
- Developed in compliance with the regulations and the latest provisions on virtual time clocking issued by the Privacy Guarantor.

# The Punch Clock for Digital Time Clocking

EcosAgile eClock is the digital punch clock for time and attendance and access control.

It requires no installation or additional infrastructure and can be placed in any work environment.

It is activated with a simple Wi-Fi, Ethernet or 4G LTE SIM connection and transmits time clocks data in real time to EcosAgile Time software or other systems already in use in the company.

Thanks to NFC and Rfid technology with eClock, all you need to do is bring the company badge close: in fact, the contactless device with automatic management algorithm of the clocking direction allows you not to have to touch it to stamp.

## Features

- 8-inch touch screen
- Ethernet connection, Wi-Fi, POE, 4G LTE SIM
- Can be integrated with API and Web Services to other business systems already in use
- Prevents time falsification with anti-fraud algorithms
- Compliant with the latest virtual time clocking regulations issued by the Privacy Guarantor.
- NFC Technology

# Attendance Tracking and Access Control with QR CODE

EcosAgile eClockQR is the Time Clock that allows Time and Attendance with QR Code in full security and GDPR compliance.

Personnel access control by opening automatic doors, turnstiles, access gates by equipping the device with a single channel relay.

## Features

- QR code generation APP available on any smartphone with access, attendance and absence management.
- Bringing the QR code close to the device displays the time in/out with your call sign and the direction of entry or exit.
- Integrated with EcosAgile Time and attendance management system with daily time card processing.
- Access control with gate opening upon recognition of the employee presenting their QR code on a smart phone in front of the front reader.
- Used for access to offices, stores, government facilities, healthcare facilities and manufacturing plants.

# Attendance Tracking and Temperature Measurement with eBiometric

EcosAgile eBiometric is the time clock for access control and personnel time & attendance with contactless thermoscanner for body temperature measurement.

It provides time clocking with **NFC technology** by simply touching the badge without touching the device, with data transmitted in **real time** to EcosAgile Time software or other systems already in use in the company.

Equipped with a **thermal camera**, it allows the detection of the **body temperature** of employees, collaborators and guests with an accuracy of  $\pm 0.3^{\circ}\text{C}$  and at a distance of 0.7 meters.

## Features

- 8-inch touch screen
- Dimensions (mm): 323 (L) 135 (W) 30 (H)
- Badge Clocking with NFC Technology
- Ethernet, Wi-Fi, Bluetooth and 4G connectivity with SIM card
- Camera with infrared sensors to measure body temperature
- Dual-lens binocular camera for personal identification
- Complies with European A.I. regulations

# Attendance Tracking and Temperature Measurement with QR CODE control

Time and attendance device with automatic QRCode validation, NFC badge reader and thermal scanner control; it is integrated with EcosAgile cloud time and attendance system.

Equipped with infrared thermal control and hardware professional QRCode reader for maximum reliability and scanning speed, has NFC badge reader and relay control for turnstile and gate opening; can be mounted indoors or outdoors (16°C-40°C) on wall, turnstiles or stand-alone with floor stand.

Produces instant communication of validation with sound, light and on-screen evidence.

## Features

- 8-inch touch screen
- Dimensions (cm): 13.3 (L) 2.4 (W) 26 (H)
- Badge Clocking with NFC Technology
- Professional QR code reader
- Ethernet connectivity, Wi-Fi
- Camera with infrared sensors to measure body temperature
- Binocular dual lens camera for personal identification
- Compliant with European A.I. and GDPR regulations
- Can be mounted indoors or outdoors (16°C-40°C) on wall, turnstiles or standalone with floor stand

# Payroll Integration

Fully integrated with administrative and **payroll** systems for convenient and efficient processing of **pay slips**.

Possibility of LUL - Time and Attendance and Absence tabulation processing for company's existing payroll system with the relevant absence and overtime **reasons** subject to justification.

Monthly availability of pay slips in **pdf format** for each individual employee.

# ABOUT US

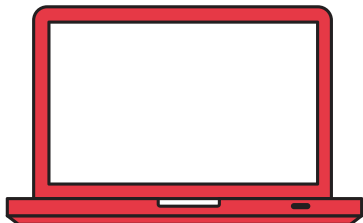

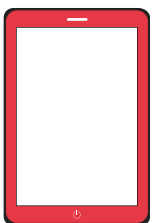

**EcosAgile** is the software platform for the management of human resources and all **people-centric** processes, developed and perfected over the years by SoftAgile, an Italian company that produces software for human resources management and development.

Founded in 2001 in **Milan**, the company, with its R&D team that has been working in the field of HR management for more than **20 years**, creates and optimizes solutions dedicated to SMEs and multinationals.

EcosAgile is designed to be used in the **Cloud**. It is web-based and has software and smartphone applications on both **ios** and **Android** to support various HR management activities.

Timesheet, Projects, **Expense Reports**, Attendance, Leave and Absence Requests, Leave Plan Management, Time and Attendance and Access Control, Vehicle Fleet and Corporate Property, **Evaluations and Competencies**.
